

LIGHTING

IFÖ ELECTRIC

We prefer to call our product groups for families. Some have been around since the 1960s. Others are brand new.

Common to them all is that they are made of porcelain, have timeless designs and a life span that surpasses most. No one knows yet how old an Ifö luminaire can become. Wiring and screws may age and need to be replaced, but the porcelain will remain just as beautiful.

Our luminaires can be used both outdoors and indoors, in saunas or wet rooms, as outdoor lighting, in the kitchen or the bedroom. The possibilities are endless.

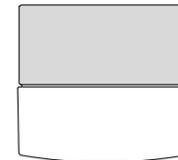

The production takes place in our own facilities in Bromölla, on the shores of Lake Ivö, in buildings originally constructed in 1947. This is where we remain and where we will always continue to produce our luminaires with skilled craftsmanship, dedicated to meeting our customers' expectations while upholding our own high standards of quality.

PORCELAIN

Every Ifö Electric luminaire is made of pressed porcelain, a beloved and durable material giving our products a potentially longer lifespan than many buildings - neither wind, water nor strong sunlight change the glazed porcelain surface. Being the only Scandinavian press porcelain producer, makes us a proud carrier of a unique manufacturing tradition.

Since the 1960s, Ifö Electric has been renowned for its unique production of porcelain luminaires in southern Sweden. Durable lighting fixtures that have become true Scandinavian classics, found in countless homes and public spaces.
